Safety Advice

Attention

In some countries approval is needed to set up a marquee/tent larger than 75 m². It is your responsibility to comply with local rules and regulations and to ensure that the marquee/tent is assembled correctly.

In case of bad weather conditions, it is your responsibility to ensure the marquee/tent is safely secured and that the marquee/tent does not cause damage to others.

Do not use open fire, welding equipment or other sources which can ignite, inside or close to the tent.

The marquee/tent must be safely secured. We recommend you secure your marquee/tent with straps and pegs as soon as it is assembled.

Make sure to check if the marquee/tent is covered by your home contents insurance.

Marquees/tents must be evacuated under extreme weather conditions.

In the event of snow always remove snow from the roof of the marquee/tent regularly to prevent snow from building on the roof as heavy snow can cause the marquee/tent to collapse.

In the event of rain there is a risk of rain puddles building up on top of the roof of the marquee/tent. Heavy rain puddles can cause the roof to collapse. It is your responsibility to ensure rain puddles do not build up. As a precaution, make sure the roof of the marquee/tent is stretched out properly and adequately over the side frames of the marquee/tent and remove rain water regularly.

Please always check our website for the latest safety advice and manual.

46	Endwall		2	2	2	2

I

Select a flat ground for the tent, unpack the carton and check all the parts including tubes, tent and accessories... etc. are present and the same as the list.

Assemble the framework of rooftop by joining the portion (15-1.15-2) together with poles (2.3-1.3-2.4) NO.3 is on four corners for diagonal pipe

II

To ensure the screw fixed to every pole tightly. And then use the turnbuckle and steel tension bar to tighten the top structure.

III

Attach one end of supported pole (1.8) to the joints

IV

Attach the another supported poles (1.8) to the joints, built-up the framework.

V

You facilitate the assembly and dismantling by pulling the roof with ropes on tent frame. Use the steel clips to fasten the cover to the frame. Each section we offer bracket and nail to fasten the frame to ground.

VI

Spread the wall panel and door panel attach to framework by using the bungee cords clasping the frame to grommets that is construct over the wall panel and door panel to ensure stability. Also use the short pegs to fix the doors to the ground.

Warning

1. In order to avoid being rusted by air, oil is covered on the surface of the pipes, before set up the tent, please remove the oil carefully first to keep the cover clean.
2. Take note that the tent needs to be handled carefully to avoid damage.
3. Do not force the frame as they may be damaged in the process.
4. Tents are meant as temporary shelter and must be evacuated under extreme weather conditions.

Please select a suitable site for the tent to avoid the damage to underground sprinkler systems, water, gas or electrical lines.
